- 50.00 = Nourishing Our Children Universal v2 Downloadable Book (PDF) + Study Guide

Included with the presentation: hand outs for audience members and additional materials to serve as background information.

To save our campaign, and the earth, the cost of materials involved in creating CD's, we distribute our presentation and study guide as an online download only.

Presentations are compatible and interchangeable on both Mac and Windows operating systems. Please note: when running Windows, we've discovered one must have Windows PowerPoint 2003 and above to view our PowerPoint.

PDF files may be used on either Mac or Windows operating systems for those who either don't have PowerPoint software, aren't familiar with it, or don't intend to edit the slides for their local community.

Slides from both the PowerPoint and PDF versions can be projected through an LCD projector, or simply viewed on your computer screen. Note that each version comes with both the slides and the notes included in our presentation. This presentation does not have to be presented at all – and may simply be used for your own education, as a book would be.
